

To our valued patient family,

Our team here at Family Dentistry has been closely following the news about COVID-19 (coronavirus) as it continues to unfold in the media. In response to concerns relating to the spread of COVID-19, we have been making every effort to maintain a safe and clean environment for you and your family. We want to inform you that while our team has always been careful in following OSHA/CDC guidelines, we are making additional efforts to provide thorough and frequent cleaning of our common areas.

We are doing our best to continue to provide the best service to everyone, however, we also want to protect and keep everyone safe and healthy. So we strongly encourage all patients and team members to follow the preventive tips provided by the CDC to prevent the spread of COVID-19, influenza (flu), and other common illnesses by:

- Staying home if you are sick or feeling unwell
- Refraining from contact with known sick people
- Washing your hands with soap or using our hand sanitizer upon entry and before/after use of the iPad
- Avoiding touching your eyes, nose, and mouth
- Covering your mouth and nose with a tissue when coughing or sneezing

Please notify our front desk if you have had any of the following in the last 48 hours:

- Fever
- Vomiting/diarrhea
- Flu symptoms (chills, body aches, significant cough, sore throat)
- Recent international travel

For those that have had a risk of exposure or are experiencing potential symptoms of infection, we are happy to reschedule your care and are thankful of the respect you are showing our other clients.

We understand that this is an ongoing process and will do our best to keep you all informed as the CDC continues to make changes in the field of dentistry. In the meantime, thank you for your trust in our team and we look forward to serving you as safely as possible.

Thank you for your trust and cooperation.

- Family Dentistry and Denture Center
